Check In – Body Map

|	
	Click on the **Check In** icon.
	Select the correct **resident**.
	Select the **medication** you wish to set up a body map for.
	Select **Body Map** icon at the bottom left of the screen.
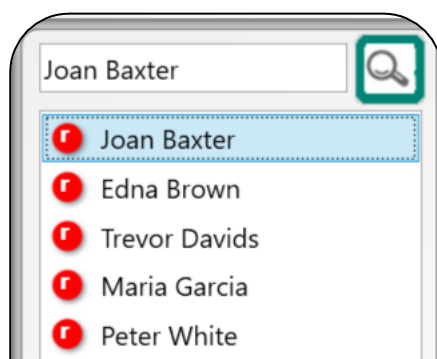

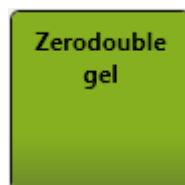

The body map will be displayed. To make changes, press the **edit** button on the top left.

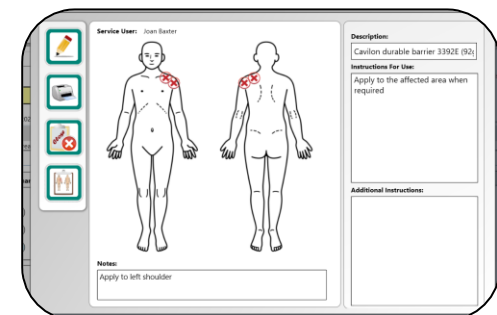

To place a new point, click the green **+** button. Drag and drop the marker to the desired location on the body map.

To remove a point, hover over the marker and then click the red **x** button.
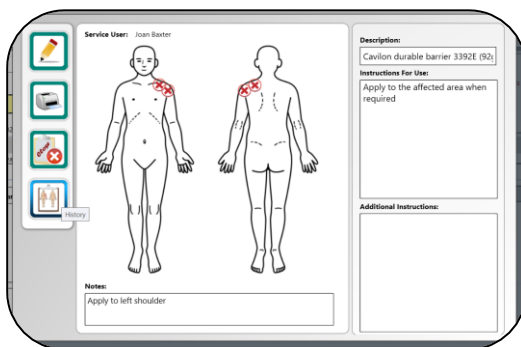

To move points, drag and drop markers.
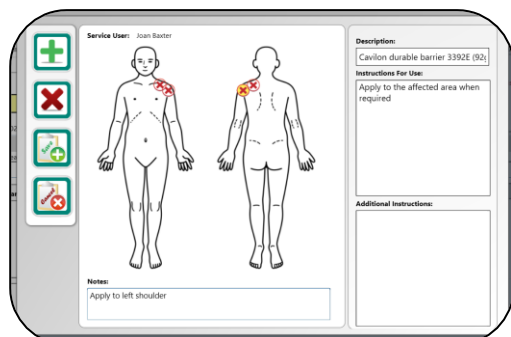

When you have completed the body map, press the **Save** button. When it has saved, click **Close**.

To print the body map. Press the printer icon and select the printer you wish to send it to.

To view where the medication was administered on the body map previously, click the history button at the bottom and then select the date/round from the filters at the top right. This can be printed by using the print button at the top left.
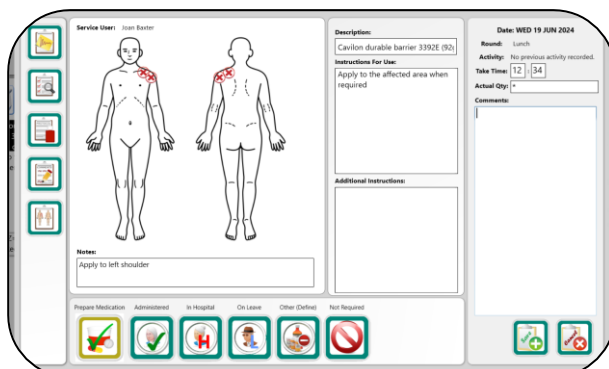

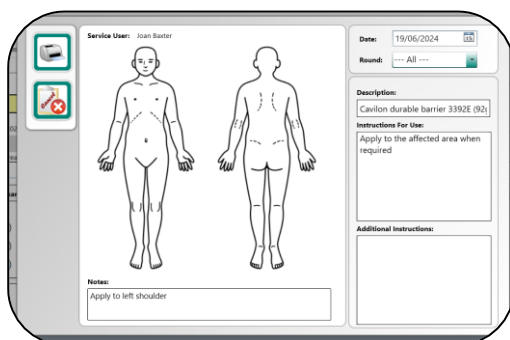

This will be the medication administration window for that medication.
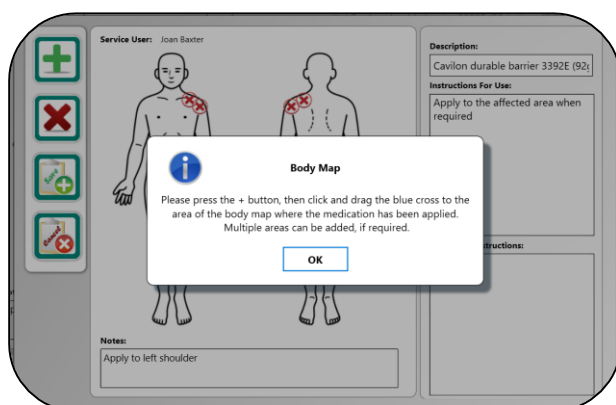

After administering the user will be asked to mark on the body map where the med was given.
