

Check In – Interval Dosing

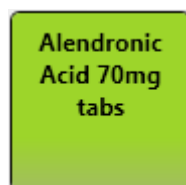

Using Interval Dosing or INT allows you to schedule dates for non-daily medication such as Alendronic acid or specific patches.

Click on the **Check In** icon.

Select the appropriate **resident**.

Check in the INT medication as normal. If you manually add the medication be sure to click “INT – Interval Dosing” in the dosage setup section.

Dosage Calendar

The dosage calendar will automatically pop up when the medication is checked in. However, you can also manually open it by clicking the **Dosage Calendar** button.

A calendar of the current cycle will appear. Click on the cells that represent the dates you want to schedule the medication for.

When you have finished editing the dosage calendar, click **Verify and Save**.

A verifier will be required.

A saving successful message box will appear.
