

GP – Edit Medication

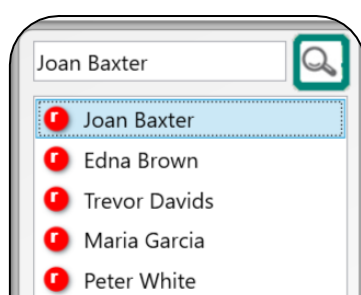

eMAR allows the GP to view reports and make necessary amendments to a resident's dosage information throughout a cycle.

Note: You will need to communicate with the Care Home that changes have been made so that the new information can sync down to the devices.

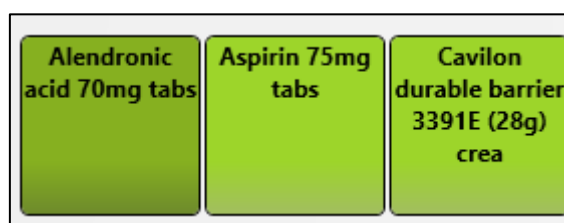

Warning: Making changes to a medication will affect the current and subsequent cycles if the medication in question does not have an end date. For your information, a list of possible scenarios/outcomes will be listed at the bottom of this QRG.

First log into eMAR and select 'Check-In'

Select the appropriate **resident**.

The bar at the top will have populated with all that resident's medication.

Logged-in User: Tom Goodson

Alendronic acid 70mg tabs	Aspirin 75mg tabs	Cefixime 500mg tabs	Digoxin 125mg tabs	Fentanyl 100mcg transdermal patches	Formoterol 450mcg tabs	Levosalbutamol 12.5g sachets	Levosalbutamol 12.5g sachets	Levosalbutamol 12.5g sachets	Levosalbutamol 12.5g sachets

18 Jun 2024 - 15 Jul 2024

Breakfast: INT 8000

Clear List

The edit medication window will now appear. The amendable sections are outlined in red.

Make all necessary changes to the Dose, Instructions, take time, type and when you would like these changes to take effect.

Once you are happy with the changes made, click save.

Amend Medication

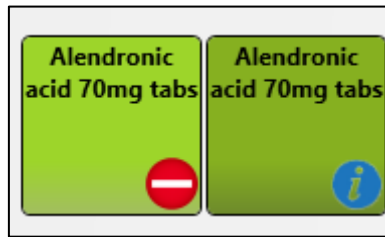

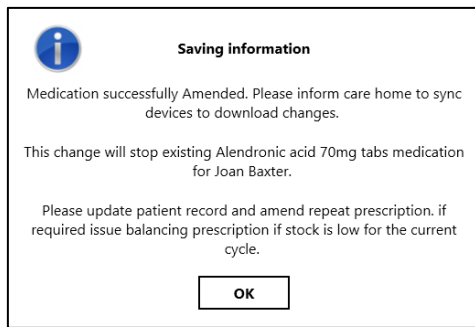

This change will stop any existing Alendronic acid 70mg tabs medication for Joan Baxter.

Please update patient record and amend repeat prescription. If required issue balancing prescription if stock is low for the current cycle.

Please insert your name to continue.

Prescriber Name:

The confirmation window will now appear. Enter the Prescriber Name and click continue to complete the changes.

The updated medication will have been added to the list at the top of the screen and the previous will have a stop sign through it.
